New Vectron models 2018

With the Roco Vectron models, countless colourful variants have their roll out in 2018 on gauge H0 tracks. Whether used for the combined freight traffic or in front of fast trains, our models have something to offer for everyone. In the following pages you will learn more about the Roco Vectron and its multitude of possible variations as well as our latest models. The paint variants of the depicted models will all be launched with their country-specific and true to the original equipment.
